ATG Training celebrates a year of staggering success

ATG Training, one of the largest training providers in the Thames Valley, is celebrating its first year in the Future Centre in Smeaton Close Aylesbury this month. Having been based in the town for over 40 years, ATG Training took the strategic decision to move into the 33,000 square foot Future Centre in September 2008. Since then and in the teeth of a recession, ATG's move and corporate restructure have generated spectacular results in terms of delivering quality training programmes.

The latest official statistics show that in the current year ATG Training has achieved a Train to Gain qualification success rate of 87.3%. Put this against the national average of 72.4% and ATG Training is in the top echelon of training provision in the country. *(LSC statistics)*

Acting Managing Director Matt Tudor commented: *'This is a proud moment for all at ATG Training and is testament to all the hard work of the tutors and trainers. It also shows the dedication and commitment of the students who are studying to improve their careers'*

To celebrate this success ATG Training is holding a day of events on 23rd September. On that day, business partners of ATG Training will be attending a breakfast seminar on the topic of 'Skills for Advanced Instrumentation'. In the afternoon there is an opportunity for young people to visit the Future Centre to discuss joining the successful Apprenticeship programme.

Editor's Notes

ATG is an educational charity with a 40 year track record of working closely with organisations to provide training that meets the real-world needs of employers. As a leading provider at national and local level in National Vocational Qualifications (NVQs), ATG Training has recognised Centres of Vocational Excellence in such areas as engineering practice, productivity, maintenance and in the fast-growing cycling industry where it is the leading provider of training for cycle mechanics in the UK.

The organisation trains staff in over 300 companies across a wide range of disciplines such as Engineering, Electrical Safety, ICT Systems, Business Administration, Management, Customer Service, Child Care, Warehousing and Distribution. Courses are externally accredited and can be tailored to meet individual company needs
