

CIEH CERTIFICATE - RISK ASSESSMENT PRINCIPLES AND PRACTICE (CIEH2)

One-Day Workshop and Practical Assignment

Course Summary

Risk assessment is a fundamental process for ensuring Health and Safety in the workplace. It is probably the most successful tool that a manager responsible for safety can possess. However, the wealth of legislation facing employers and the self-employed has caused confusion and concern; much mystery has been built around the process of Risk assessment. Delegates will gain an insight into how Risk Assessment can be made easier if undertaken using a logical and systematic approach. This one-day Workshop is combined with a Practical assignment, which counts towards the award of a CIEH Certificate.

Who Should Attend

Managers, Supervisors and Safety Representatives who have a responsibility for carrying out Risk Assessment and wish to increase their awareness of health and safety at work.

Benefits to You and Your Organisation

By the end of the Workshop and assignment, participants will be able to:

- Contribute to the Risk Assessment programmes at their workplaces.
- Conduct Risk Assessments (assuming they have the necessary technical knowledge in relation to the activities/environments/issues being assessed).
- Organise and implement a Risk Assessment programme where this has not already been started.
- Participate in the identification of specific training needs for the activities being assessed.
