

## WORKING AT HEIGHTS REGULATIONS (HS09)

A one-day Workshop on how to comply with this important new legislation

### Workshop Summary

Falls from height are the biggest cause of fatal and serious injuries in construction. They account for some 50% of all deaths (source HSE). With the introduction of new legislation, this Workshop sets out the legislative background and also provides interpretation of the responsibilities of duty holders to ensure statutory compliance. It covers the issues of working at height and uses case studies and accident statistics to reinforce the need for effective risk assessments and working practices.

### Who Should Attend

- Anyone involved in the use, planning and authorisation of requirements for working at heights
- Supervisors, Safety Representatives and Operatives involved in working at heights

### Benefits to You and Your Organisation

By the end of this Workshop, participants will be able to:

- Evaluate the impact of the new regulations
- Pro-actively implement procedures and controls with regards to the new legislation
- Carry out safe work at height, using appropriate prescribed equipment to carry out the work

### Workshop Contents

- Introduction
